

Do You Have

Myotonic Dystrophy Type 1 (DM1)?

We are looking for adults ages 18-65 years old to participate in an interview study about their daily experience with DM1.

You may qualify to participate in this study if you have:

- **Diagnosis of juvenile or adult onset DM1**
- **Some arm or leg myotonia with some walking difficulty**
- **Able and willing to participate in a Zoom conference**

No therapeutic intervention or treatment will be administered as part of this study.

To participate:

Call: 970-888-3569

Email: Mimi@LORAGroup.com

- Ask to be screened for the DM1 Interview Study.
- We will ask you some questions to find out if you are eligible and obtain your signed consent to participate in the study.

What does this study involve?

One 60-minute Zoom interview with compensation of \$150.00

Daily completion of a new electronic DM1 questionnaire for 28 days with compensation of \$420.00
